DETAILED ACTION

Drawings

- ✓ 1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 6. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
- ✓ 2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “plurality of fiber sections” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

- ✓ 3. Claim 16 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The parent claim also recites a fiber bent so that the average torque on the fiber is about zero.

Claim Rejections - 35 USC § 112

- ✓ 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 22-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What is meant by the limitation, "the optical fiber is movable and still stabilized on the carrier element?" How can there be both?

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 15-17 and, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hart Jr. et al.

Hart discloses an optical fiber (13) having sections. Each section has at least one right hand curvature and one left hand curvature (claim 1 lines 24-27).

This fiber is bent repeatedly so that the right hand and left hand curvatures are distributed over the optical communications link so that the average torsion of the optical fiber over the link is about zero (abstract, last three sentences).

Regarding claim 17, Hart discloses that the fiber is wound in a helical shape, alternating right and left handed helix (abstract).

Regarding claim 20, Hart discloses a cylindrical carrier element (fig. 3).

Allowable Subject Matter

8. Claims 18-19, 21 and, 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter: First and second fibers helically wound with different directions of a communications link.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huang and Ichimura et al teach right-handed and left-handed bending of a fiber so that the net torque is about zero.
